DETAILED ACTION

Newly submitted claim 22 directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: the new claim 22 directed a species wherein each of the refraction surface and the diffraction surface of the collimating lens has a varying focal point, and wherein a focal distance of the diffraction surface is offset by the varying focal point of the refraction surface, while the elected invention directed to a species wherein the power of the diffraction surface is larger than the power of the refractive surface, and the refraction surface and the diffraction surface have a power which satisfies the condition $-3 \leq K_d/K_r \leq -2$.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claim 22 is withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Allowable Subject Matter

Claims 2-5, 9, 11 and 16-20 are allowed.

Conclusion

This application is in condition for allowance except for the following formal matters:

The presence of the non-elected invention including claim 22 discussed above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
